PROFESSIONAL SUMMARY

Senior Java Full Stack Developer with 10+ years designing and deploying scalable enterprise web applications, microservices, and RESTful APIs across infrastructure management, banking, and healthcare domains. Proven track record modernizing legacy platforms, leading cross-functional Agile teams, and delivering high-availability systems. Hands-on experience integrating AI/LLM-powered features into production platforms.

CORE TECHNICAL SKILLS

- **Languages & Frameworks:** Java (8/11/17/21), Python, Go (Novice), TypeScript, JavaScript, SQL, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Spring Batch, Spring Cloud, Spring AI, Hibernate ORM (JPA), Jakarta EE, Angular
- **APIs, Protocols & Databases:** RESTful Web Services, OData, Redfish, SNMP, gRPC, GraphQL, WebSockets, MySQL, MSSQL, PostgreSQL, MongoDB, TimescaleDB, Redis, OpenSearch
- **Cloud, DevOps & Messaging:** AWS, Docker, Kubernetes, Jenkins, Maven, Gradle, Git, SVN, SonarQube, Blackduck, JFrog Artifactory, Apache Kafka, ActiveMQ, CI/CD
- **Observability & Monitoring:** Prometheus, Grafana, Jaeger
- **AI & Agentic Tools:** Spring AI, Agentic AI, Generative AI, LLM Integration, RAG, Vector DB, MCP, GitHub Copilot, Windsurf Cascade, Spec Driven Development (DD), Prompt Engineering, Evaluators, Claude, OpenAI, Ollama, Advisors, Embeddings and Vectors, Tool Calling
- **Testing, Monitoring & Methodologies:** JUnit 5, Mockito, Jest, Cypress, Angular TestBed, JaCoCo, Postman, Agile, Scrum, Scrum@Scale, Pod/Squad, Kanban, PI Planning, Jira, Confluence

PROFESSIONAL EXPERIENCE

Software Senior Engineer | Dell Technologies

June 2022 – August 2026

- Developing Dell OpenManage Enterprise (OME), a flagship high-availability infrastructure management console for monitoring and managing 25,000+ PowerEdge servers, using Spring Boot microservices and Angular 20 with Nx monorepo | Product: dell.com/OpenManage-Enterprise
- Integrated/Onboarded new Dell Hardware Compute Servers, Integrated Rack Controllers (IRC), Cooling distribution Units (CDU), Power shelves into OME and Designed and developed Device packs for these device types using REDFISH DMTF protocols and contributed to Database design.
- Led Scrum of 6-8 members as Rotational Scrum Master and delivered production releases for Microsoft System Centers Plugins for OpenManage Enterprise.
- Led the team of 4 members and upgraded tech stack of the OME platform — migrated from **Hibernate 5 → 6, Spring Framework 5 → 6, Spring Boot 2 → 3, Java 11 → 17, Jakarta EE (javax → jakarta namespace)**, and upgraded Gradle, JUnit 4 → 5, and all dependent libraries to latest stable versions — improving application performance by 20-30% and resolving the majority of open security vulnerabilities.
- Built an Automated Defect Resolver AI skill which takes JIRA defect ID as input and fetches details via MCP, performed RCA and suggested the fixes.
- Built multiple applications within Dell by leveraging power of AI such as, Sonar Scanner, Blackduck scanner, Jenkins build failure logs AI analysis etc.

Lead Software Engineer | Deloitte USI

June 2019 – June 2022

- Led development of **Model Risk Management (MRM)** platform for **Bank of America, Citibank, TIAA, and Wells Fargo**, enabling full lifecycle model governance, validation, and regulatory compliance (OCC SR 11-7)
- Designed **RESTful APIs** using **Java, Spring MVC, Hibernate** with **Spring Security** OAuth 2.0/JWT for multi-tenant banking environments; developed **Spring Batch** pipelines processing 1M+ records daily

- Led team of 4 members to migrate a legacy database containing millions of records to the Model Risk Management App, onboarding the banking client smoothly with no disruption to operations.
- Automated weekly email notifications with attached reports, eliminating manual report generation and saving ~30 hours per month.

Senior Software Engineer | Iglulabs Softwares Pvt Ltd

February 2019 – June 2019

- Developed Humine V2, a payroll management and recruiting web portal for Decathlon India, supporting rapid retail expansion across India | Live: humine.decathlon.in
- Served as SPOC for full product development lifecycle — from requirement gathering through deployment — while leading a team of 3 developers/testers.
- Built an automated payroll reporting module that eliminated manual review, saving 7 working days per month across 2 engineers.

Software Developer | Data Template Infotech Pvt Ltd

June 2016 – December 2018

- Developed ClinAlly mPower Health, an ABDM-compliant HMIS with AI-powered CDSS (built with AIIMS New Delhi), serving hospitals across India; used by ASHA health workers nationwide for field-based health surveys | Live: abdm.gov.in/partner-offers-details/OQ
- Delivered 15+ projects across healthcare, automobiles, and marketing domains, serving as the go-to engineer for proof-of-concept builds and client proposals/pitches; mentored a team of 2 developers through technical challenges and assignments.
- Explored and built with open-source technologies including Blockchain/Web3, expanding the team's technical range beyond core web stack.

PERSONAL PROJECTS

Autonomous AI Customer Support Agent | Java, Spring Boot, Spring AI, OpenAI, MCP, MySQL, Docker

- Built a fully autonomous, multi-service support agent (Spring Boot + Spring AI + OpenAI) using the Model Context Protocol (MCP) that polls a mailbox, classifies intent/sentiment, resolves customer issues via an LLM-driven tool-calling loop, and replies with zero human in the loop.
- Architected a two-service system — an MCP server exposing 8 business tools (customer lookup, order/payment retrieval, warranty checks, refund issuance, ticket logging) backed by a normalized MySQL schema, and an agent service that autonomously plans and executes multi-step resolutions for duplicate charges, warranty claims, and refunds.

CORE COMPETENCIES

Full Stack Java Development | Agentic AI & LLM Workflows | RESTful API & Microservices Design | Spring Boot / Spring AI | Spec-Driven Development | Product Ownership & Agile Leadership | Datacenter Infrastructure (Redfish / OME) | System Design | AWS | CI/CD & DevOps | AI Agent Development (Code Generation & Test Automation) | MCP | RAG | Vector DB Qdrant

EDUCATION

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

2011 – 2015 | CGPA: 7.4/10

CERTIFICATIONS

Certified Scrum Master from DQA Dell Technologies.

ACHIEVEMENTS

- Contributed to **White Papers at Dell Technologies** on Cluster Aware-Updating via OpenManage Enterprise.
- **PAN India Agentic AI Hackathon Winner at Dell Technologies** Built OME Assist, An AI-Powered Agent enabling customers to interact with OpenManage Enterprise Platform and find resolutions for queries within seconds, eliminating the need for manual searches online or customer support escalation.
